

Weco Bulk A/S chartered mv 'Santa Pacific' for one trip from Brazil to USA with a cargo of steel coils. Unfortunately, we were not able to get proper bunkers (LSMGO) in Rio De Janeiro, as there were no more LSMGO available.

Our alternative was to lift HSMGO (Sulphur content of 0.1%), but we were informed by vessel's Headowners that this fuel was not compatible with vessel's fuel tanks, as they were all restored for LSMGO. Therefore, we were forced to lift bunkers of 1% Sulphur content.

We kindly ask you to grant this waiver for our forthcoming voyage, as there simply was not LSMGO available and we will reach no bunker ports en-route to New Haven, USA.

Pleased to hear from you.

Yours faithfully
